

Searches for “gpt” barely registered around GPT-3, then took off after ChatGPT

Google Trends, worldwide web search, monthly, Sep 2018 to Sep 2026. Each row is indexed to its own peak.

Rows are comparable in shape, not level: 100 is each term's own busiest month. "gpt" was below 1 every month until Nov 2022. "llm" before 2022 is mostly the law degree; "gpt" also matched the disk-partition meaning. Google matches terms loosely.
