

§ FIG 1 · YC BATCH COMPOSITION

B2B peaked at 69% of a YC batch in 2023.
Industrials has tripled since 2019.

Share of each batch's companies carrying YC's top-level industry label, Winter 2019 to Fall 2026.

A batch is one YC intake of startups; ticks mark batches, years their first batch (two a year to 2023, three in 2024, four from 2025). Dashed: least-squares fits split at the ChatGPT rule, in points per year. Hollow marker: batch under 50 companies, excluded from the fits. A company can carry more than one label.
