

§ FIG 4 · FULL-STACK AI COMPANIES

Full-stack AI companies are 12% of YC's Summer 2026 batch. Before ChatGPT they were never more than 4%.

Share of each batch's companies that run the service themselves with AI doing the core work (Jared Friedman's definition), Winter 2019 to Summer 2026.

Each tick is one batch. Classification is ours, not YC's: every company from Winter 2019 on was read against a written rubric (fullstack/rubric.md) and the full-stack AI calls were re-read by a second reviewer.
